S. NITHIESH

Hosur, Tamilnadu -635126 | AI & Quantitative Analytics Enthusiast | +91 94867 27231|www.linkedin.com/in/nithiesh-s-0482b924a/| mksnithiesh2004@gmail.com

Summary

AI & Quantitative Analytics Enthusiast with a strong foundation in mathematics, statistical modelling, and financial analytics. Experienced in building Python-based analytical pipelines for market risk evaluation, portfolio optimization, volatility forecasting, and econometric modelling using real-world financial datasets.

Currently pursuing advanced training in Data Science and Analytics while expanding expertise in Artificial Intelligence, machine learning workflows, and emerging Generative AI applications. Interested in developing intelligent data-driven solutions across financial analytics, risk modelling, and applied AI environments.

Experience

DEC 2024 – FEB 2025
Finance Intern | Tinkas Industries | Chennai,TN

Assisted in the preparation of detailed financial statements and reports, ensuring accuracy and compliance. Conducted variance analysis to identify discrepancies and support strategic budgetary planning. Collaborated with cross-functional departments to analyze the financial implications of operational decisions. Gained deep insights into financial operations which enhanced core analytical and decision-making skills.

DEC 2023 – FEB 2024
Data Science Intern | Codsoft

Leveraged analytical and programming skills to develop robust data-driven solutions using Python. Executed end-to-end data pipelines including collection, cleaning, and complex analysis. Developed predictive models that provided valuable insights into data trends to support business decision-making.Utilized advanced Python libraries for data visualization to communicate findings effectively to stakeholders

Skills

- Certification: Google Certified Data Analytics, IBM Certified Data Engineering Courses
- Technical Skills: Python, MySQL, Power BI, Excel, Predictive Modelling
- Libraries for Modelling: Numpy, Pandas, SciPy, Statsmodels
- Soft Skills: Good in communication, Leadership

Education

JUNE 2022-2025
Bachelor of Mathematics | Loyola College | Chennai

7.4/10 CGPA • Leading Cadet of Loyola NCC Navy

SEP 2025-PRESENT

Masters In Data Science & Analytics | M S Ramaiah University of Applied Science | Bangalore

8.2/10 CGPA - **1st SEM** |

Projects

Quantitative Risk & Performance Dashboard | ***Python, Pandas, NumPy, SciPy, Matplotlib***

- Engineered a fully automated risk-analysis pipeline processing over 10 years of NIFTY 50 historical data to calculate daily/annualized returns, volatility, and Sharpe ratios across 50 constituent equities.
- Developed a production-ready financial dashboard leveraging Matplotlib GridSpec, featuring risk-return scatter plots, kernel density estimations (KDE), and sector-wise performance benchmarking.
- Implemented statistical comparative models and Gaussian distributions to rank stocks by percentile, mapping outliers and identifying the top decile of assets based on volatility clustering and risk-adjusted return

Algorithmic Portfolio Optimizer & Asset Pricing Engine | ***Python, SciPy, QuantLib, YFinance, Scikit-learn, Statsmodels***

- Built a Modern Portfolio Theory (MPT) optimization tool utilizing scipy.optimize (SLSQP) to dynamically generate custom asset weights, successfully maximizing the Sharpe Ratio and mathematically minimizing portfolio risk.
- Simulated portfolio returns distributions against major indices via live YFinance API data, fitting Gaussian normal bell curves to deliver analytical breakdowns of expected annualized returns and downside volatility.
- Designed a comprehensive quantitative analysis pipeline to execute ARCH/GARCH volatility forecasting, Statsmodels OLS linear regression, and QuantLib Black-Scholes European call option pricing.
